

Surgery Center of Pinehurst

Home Instructions for Bilateral Myringotomy and Insertion of Ventilation Tubes

Ear Drops:

If your doctor has prescribed ear drops, use them as instructed. Warm the drops before you put them in your child's ears by holding the bottle under warm water like a baby bottle or rub the bottle between your hands.

Activity:

Keep water out of your child's ears, especially when you wash his/her hair. You may use a cotton ball saturated with Vaseline on the end or Mack's ear plugs.

If you have questions or concerns, do not hesitate to contact our office. Office hours are Monday through Friday, 9a.m. until 4 p.m. If you have questions after 5 p.m. or on the weekend, call First Health Moore Regional Hospital at 910-715-1000 and ask for the ENT physician on call.
